LOGAN UNIVERSITY

Trimester One Doctor of Chiropractor iPad Requirements

All students entering the Doctor of Chiropractic program are required to have an iPad in order to complete classroom exams. The use of an electronic test taking system through the iPad allows Logan to track the performance of students at the course level and allows the student to monitor their academic progress at a detailed level. It permits faculty and students to accurately identify potential subject areas that the student may need additional resources, such as tutoring, put towards. The system will also allow faculty and students to monitor their progress towards achieving academic benchmarks as they progress towards their clinical experience.

Students will take tests through ExamSoft on the iPad. In order for the ExamSoft to run efficiently, the iPad must have:

- iOS 8, 9 or 10
- 30% charge to commence a Secure Exam
- 500 MB of free space required to commence an exam
- Not been 'Jail Broken'

While older model iPads are supported by the testing software, students are encouraged to bring a current model iPad. The vendor may change the list of supported devices at any time, leaving older devices unsupported. A newer iPad is more likely to retain its usefulness throughout your entire degree program. iPad Mini's are not recommended because the smaller screen size may place students at a disadvantage when testing or viewing educational material.

Additional detailed system requirements for iPads is available from ExamSoft's support site: http://support.examsoft.com/h/i/258198564-what-are-the-minimum-system-requirements-to-use-softest-m-ipad/259098
