New Electives – Fall 2019

TECH3W901 Occupational Consulting – 2 credit hours

Students will evaluate worksites for ergonomic risks impacting the safety and efficiency of the workforce. Students will use a needs analysis approach and interpret OSHA logs to design interventions to improve work stations and employee practices while on the job. Additional content includes conducting disability evaluations, the scope of practice of the occupational consultant, and the role of key personnel in maintaining occupational health and safety of employee's in a variety of settings.

Pre-requisite: Completion of CLIN30701.

TECH3N901 Neurology in Clinical Chiropractic Practice – 2 credit hours

This course is a more advanced investigation of Neurology as it applies to Chiropractic Practice. Students will actively engage in the review of patient case (signs, symptoms, hix, etc), development and defense of a different diagnosis, as well as the appropriate testing and direction of appropriate patient management, which, when required, will be of a multidisciplinary nature. This course will also focus on the application of Chiropractic principles and methods of practice, directed of the patient condition and resolution, and provide students with a review of current literature substantiating and directing management of conditions. The overall goal of the course is to guide students through patient care of neurology case scenarios in a complete fashion, from patient signs and symptoms, through examination, diagnosis development, testing strategies, and also management of conditions based upon review of current research providing a scientific rationale to Chiropractic Management.

Pre-Requisite: Current Clinic Status of Tri 7 or above

TECH3V901 Eval & Management of Military and Veteran Patients – 2 credit hours

A course designed for the health care professional student which will provide clinically relevant and evidence based methodologies about the assessment, evaluation, and treatment specifically with VA and DoD patient populations. Treatment options from least invasive to most invasive will be discussed. We will explore behavioral approaches, pharmacotherapy, procedural techniques and the integrative options, leading to an appreciation of the various disciplines providing care. We will also discuss special populations with the VA/DoD that include (TBI, geriatric care, amputee, PTSD, and depression) which will allow the practitioner to understand and appreciate the management of pain within this patient base. This course will be a general overview of what to expect within a VA/DoD facility, the culture, and chiropractors role with these settings. Pre-Requisite: 5th Trimester completed.

TECH3K901: Viscero-Somatic and Somato-Visceral Effects – 3 credit hours

Somato-visceral and viscerosomatic effects in clinical diagnosis and treatment. A holistic approach to patients using chiropractic adjusting, nutrition, lifestyle management and manual soft tissue techniques from chiropractic, applied kinesiology, Sacro-Occipital Technique TM and osteopathy. Pre-requisite: Tri 6 standing or instructor permission.

TECH3Q701 Acupuncture I – 2.5 credit hours

This course represents the first 45 hours toward the 100 hour acupuncture certification. Students will explore traditional Chinese medicine (TCM) history, philosophy and theories. They will apply TCM history taking and evaluation skills to address common musculoskeletal conditions. Students will display practical applications of acupuncture treatment. The course will consist of lecture and practical workshop time. The utilization of Clean Need Technique to meet OSHA standards will be emphasized. This course is designed to help prepare students to successfully pass required examinations for acupuncture licensure. Pre-requisite: Successful completion of Trimester 4 course
