

Certified Insurance Consultant

Advance your career with the Certified Insurance Consultant credential. Insurance auditing and consulting is a critical piece to compliant and profitable physician practices. With tighter regulations on reporting healthcare services and payer compensation for those services, Insurance Consultants must have a clear understanding of when a practice is at risk for non-compliance. Certified Insurance Consultants are valuable to healthcare practices and to insurance organizations. Whether it's working for healthcare practices, insurance organizations or just for your individual practice, as a Certified Insurance Consultant you will be able to use your proven knowledge of coding and documentation guidelines to improve all healthcare practices.

We are happy to bring Dr. Mario Fucinari back on campus. As a seasoned practitioner and a nationally recognized speaker, author and instructor, he has decades of experience in compliance, coding and documentation. Dr. Fucinari is a past instructor for Insurance Consulting, Medical Compliance and a Certified Professional Compliance Officer through the AAPC.

Certified Insurance Consultants demonstrate expertise in:

- Medical documentation, fraud, abuse, and penalties for documentation and coding violations based on governmental guidelines
- Coding Concepts
- Audit Scope and Statistical Sampling Methodologies
- Medical Record Auditing Skills
- Medicare and Commercial Carrier Guidelines
- Quality Assurance and Coding Risk Analysis
- Communication of Results and Findings
- The Medical Record

Instructors

Taught by Mario Fucinari, DC, CCSP, APMP, CPCO, MCS-P
