

# Chiropractic Grand Rounds

## Saturday, October 20, 2018

“Chronic Musculoskeletal Pain,  
Myofascial Trigger Points and Central  
Sensitization: Integrating Pain  
Mechanisms with Objective Physical  
Findings and Treatment Strategies”

**Presented by:**

**Jay P. Shah, MD**

Education Coordinator, Medical Section Rehabilitation Medicine  
Department, Clinical Center National Institutes of Health, Bethesda,  
MD

Senior Staff Physiatrist Rehabilitation Medicine Department,  
Clinical Center National Institutes of Health, Bethesda, MD

Affiliate Professor, Department of Bioengineering Volgenau, School of  
Engineering George Mason University, Fairfax, VA

### Myofascial Pain Syndrome

- What is the role of the muscle?
- What is the role of the MTxP?
- What happens when a MTxP becomes *active* (i.e., spontaneously painful)?
- What is the role of the nervous system and brain?
- What is the role of the fascia?

### Myofascial Pain Syndrome
