ACCREDITATION FROM THE HIGHER LEARNING COMMISSION (HLC) MATTERS

Learn how accreditation helps bolster our institution's commitment to excellence in health sciences, education and service, and how we are preparing for the HLC's campus visit this fall.

Logan University has been accredited by the HLC since 1987.

Components of a Comprehensive Evaluation

For all institutions, a comprehensive evaluation includes the following components:

- Submission and review of an assurance filing demonstrating compliance with the HLC's Criteria for Accreditation
- Federal compliance review
- Student opinion survey
- On-site peer review visit

As part of the assurance review, the institution submits an assurance argument along with materials of evidence (called an Evidence File) to demonstrate that it is in compliance with the HLC's Criteria for Accreditation. The team of peer reviewers conducting the comprehensive evaluation review these materials in preparation for an on-site visit. Institutions on the open pathway demonstrate their institutional improvement efforts through the quality initiative process.

Criterion 5: Institutional Effectiveness, Resources and Planning

The institution's resources, structures and processes are sufficient to fulfill its mission, improve the quality of its educational offerings and respond to future challenges and opportunities.

- o Through its administrative structures and collaborative processes, the institution's leadership demonstrates that it is effective and enables the institution to fulfill its mission.
- o The institution's resource base supports its educational offerings and plans for maintaining and strengthening quality in the future.
- o The institution engages in systematic and integrated planning and improvement.
