

LOGAN UNIVERSITY

iPad Requirements for Course Assessments College of Chiropractic

All students entering the Doctor of Chiropractic program are required to have an iPad in order to complete classroom exams. The use of an electronic test taking system through the iPad allows Logan to track the performance of students at the course level and allows the student to monitor their academic progress at a detailed level. It permits faculty and students to accurately identify potential subject areas that the student may need additional resources, such as tutoring, put towards. The system will also allow faculty and students to monitor their progress towards achieving academic benchmarks as they progress towards their clinical experience.

Students will take tests through ExamSoft's testing app, Examplify, on the iPad. iPadOS 13 is supported on version 3.8 of Examplify for iPad. In order for Examplify to run efficiently, refer to the minimum requirements:

- Hardware Requirements: iPad 5+, iPad Air 2+, iPad Mini 4+, iPad Pro.
- Operating Systems: iPadOS 13, iPadOS 14, and iPadOS 15 (Only officially approved Apple versions of iPadOS are supported).
- 500 MB of free space required to commence an exam.
- iPad must not be modified (e.g. Jailbroken).
- Internet connection for download, registration, exam download and upload.
- In order to take an exam using an iPad, your institution must first enable iPad support. Please contact your institution if you are unsure whether they have enabled iPad support.

While older model iPads are supported by the testing software, students are encouraged to bring a current model iPad. The vendor may change the list of supported devices at any time, leaving older devices unsupported. A newer iPad is more likely to retain its usefulness throughout your entire degree program. iPad Mini's are not recommended because the smaller screen size may place students at a disadvantage when testing or viewing educational material.
