

MASTER OF SCIENCE IN *Integrative Pediatrics*

ONLY AT LOGAN UNIVERSITY.
STARTING FALL 2022. ONLINE*.

EXPERT-LED DEGREE PROGRAM

Logan's Master of Science in Integrative Pediatrics is overseen by program founder Elise Hewitt, DC, DICCP, FICC, a board-certified pediatric Doctor of Chiropractic and one of the foremost authorities in the specialty of chiropractic pediatrics. She has spent more than 30 years advocating for the chiropractic care of children, and served as President of the ACA Pediatrics Council for 10 years. In addition to treating children in her pediatrics-only practice, Dr. Hewitt is a member of the prestigious NCMIC Speakers Bureau for which she teaches all aspects of pediatric practice. Dr. Hewitt was named 2019 Pediatric Chiropractic of the Year by the ACA Pediatrics Council.

CUTTING EDGE. CLINICALLY FOCUSED. EVIDENCE BASED.

The Master of Science in Integrative Pediatrics degree provides high-quality, clinically focused, specialized training for U.S. and internationally licensed Doctors of Chiropractic who want to take their pediatric knowledge and expertise to a higher level. Gain a working knowledge and understanding of the anatomy, physiology, neurology, and nutritional needs of pediatric patients, including the health impacts of the prenatal environment and birth process; improve manual therapy skills with training in spinal, cranial, and extremity techniques; learn how to manage common and uncommon pediatric health conditions while appraising and assimilating scientific evidence; and dive into management of pediatric sports injuries and extremity conditions, including mild traumatic brain injury (MTBI). This program blends passion, excellence, and leadership in an integrative approach to pediatric health care.

RECOGNIZED LEADER IN EDUCATION

Founded on more than 85 years of chiropractic education, Logan is proud to be the *first* chiropractic university in the U.S. to offer a Master of Science degree in Integrative Pediatrics. Logan provides a rigorous evidence-based curriculum coupled with deep experience and skill in distance learning. Additionally, Logan has a reputation for cultivating enriching and collaborative clinical experiences with multidisciplinary health care providers and organizations. These partnerships provide Logan students with unique training opportunities to improve patient care within integrative and collaborative environments.

**Two in-person practicums are included for hands-on learning, one per year each held over a long weekend.*
