

**Purpose of Assessment**

The focus of this report is to provide an overview of the employment and continuing education outcomes for the class of August 2020.

**Methods**

Career Services (CS) adheres to the National Association of Colleges and Employers (NACE) standards for collecting outcomes data at various intervals within the nine months preceding and following graduation.

Career Services administered the First Destination and Exit Surveys electronically through Handshake to Logan University students on track to confer an undergraduate, masters, or doctoral degree for the Summer 2020 trimester. CS team members continued to follow up with graduates and collect data through the Handshake platform, by conducting phone calls, through direct email inquiries, and by obtaining information provided in LinkedIn profiles.

**Description of Participants**

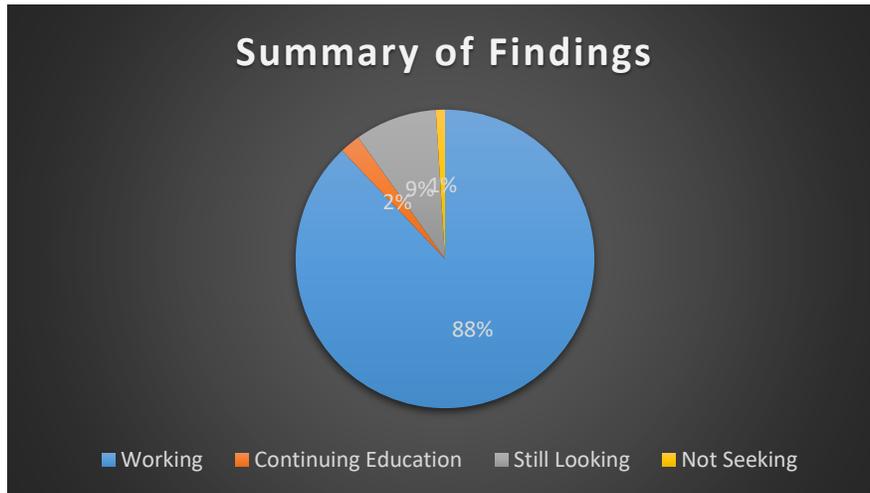

This report includes data from surveys administered to 126 Logan University alumni earning Bachelors, Masters, or Doctorate degrees during the Summer 2020 trimester. Of that total, Career Services was able to verify the status of 89 alumni representing an overall response/knowledge rate of 70.6%.

**Responses by Degree Level**

<i>Degree Level</i>	<i>Response Count</i>
<i>Bachelor's</i>	1
<i>Master's</i>	45
<i>Doctoral</i>	43
<b>Total</b>	<b>89</b>

## Findings

Out of 89 alumni respondents, seventy-nine graduates (89%) were found to be employed full or part-time, two (2.24%) were continuing their education, eight graduates (8.99%) were actively seeking employment, and one (1.1%) alumni reported that they were not seeking employment. 91% of Logan University graduates from the Summer 2020 trimester were found to be satisfactorily occupied within nine months of graduation. Graph below.

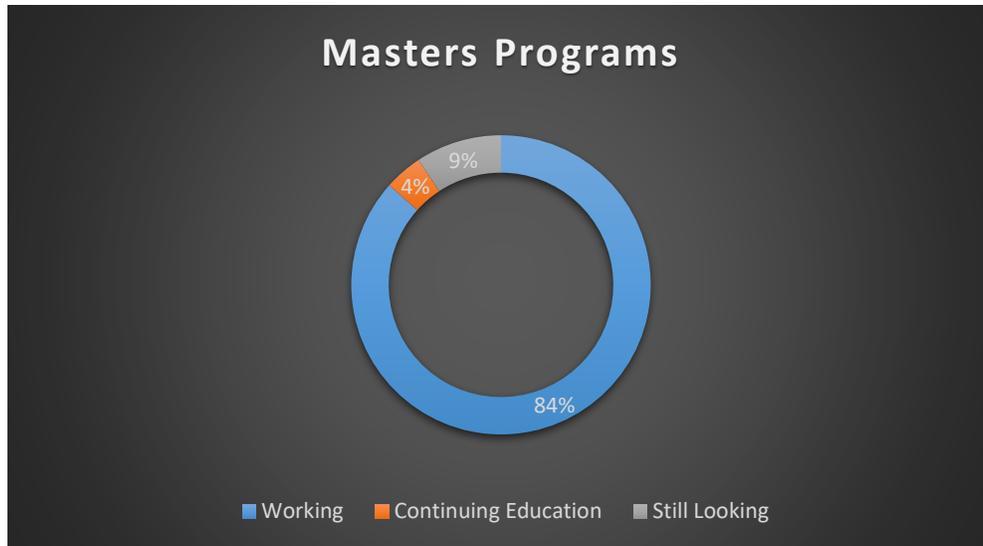

## Bachelors Programs

There was one undergraduate degree conferred during this reporting period. Career Services was able to verify the status of one Human Biology major who indicated that they were actively seeking employment.

## Masters Programs

Results obtained from forty-five alumni enrolled in Logan's master's degree programs indicate that thirty-eight (84%) were working, two (4%) were continuing their education, and four (9%) were still seeking employment. One graduate reported that they were not currently seeking employment. 91% of Logan's master's degree graduates were satisfactorily occupied within nine months of graduation. Graph below.

### Health Informatics

Career Services was able to verify the status of two Health Informatics graduates who indicated that they were both employed. One graduate was working in the same position unrelated to healthcare that they held prior to starting graduate school. The other graduate was working in the same position that they held prior to starting graduate school for a healthcare analytics company.

#### *Master of Science in Health Informatics*

<i>Employed</i>	2	100%
<i>Seeking Employment</i>	0	0%
<i>Total Responses</i>	2	100%

### Nutrition and Human Performance

Data collected from thirty *Nutrition and Human Performance* alumni indicated that twenty-four (80%) were employed in positions related to their degree. Two (6.7%) respondents indicated they were planning to continue their education. One graduate reported enrollment in the Doctorate of Naturopathic Medicine program at Southwest College of Naturopathic Medicine, while the other alumni intended to take additional coursework at Logan. Three (10%) alumni indicated that they were actively seeking employment. One (3.3%) graduate reported that they were not seeking employment.

*Master of Science in  
Nutrition and Human  
Performance*

<i>Employed</i>	24	80%
<i>Continuing Education</i>	2	6.7%
<i>Seeking Employment</i>	3	10%
<i>Not Seeking Employment</i>	1	3.3%
<i>Total Responses</i>	30	100%

**Master of Science in Sports Science and Rehabilitation**

*Sports Science and Rehabilitation (SSR)* alumni supplied twelve survey responses. All twelve respondents indicated that they were working in positions related to their degree. Table below.

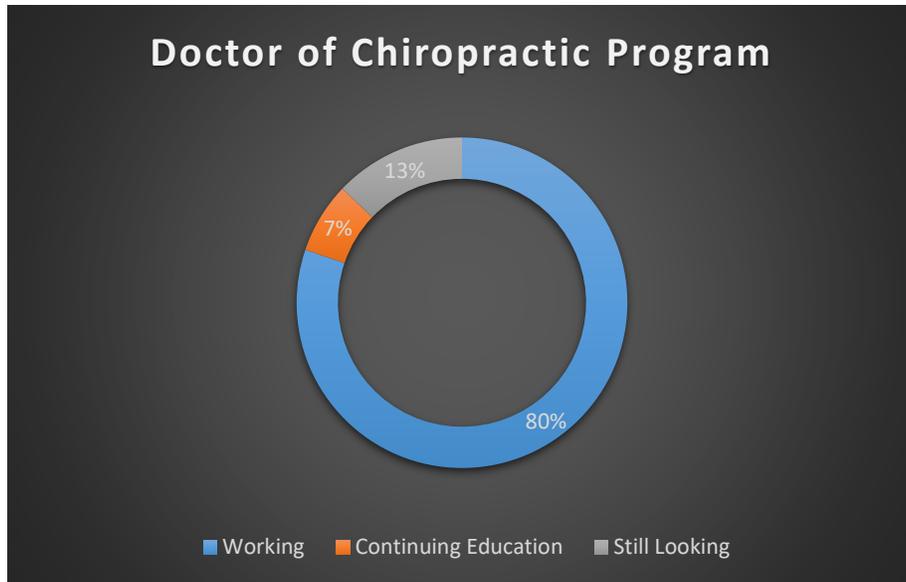

*Master of Science in Sports  
Science and Rehabilitation*

<i>Employed</i>	12	100%
<i>Total Responses</i>	12	100%

**Doctoral Programs**

Career Services obtained information from forty-six survey participants enrolled in the Doctor of Chiropractic program. Data indicated that thirty-eight (81%) were working. Three students (7%) required additional coursework. Six graduates reported that they were still seeking employment. 87% of Logan's doctoral graduates were found to be satisfactorily occupied within 9 months of graduation. Graph below.

There were zero responses from the Doctorate of Health Professions Education program.

All of the employed DC graduates were found to be working in chiropractic-related positions. All three of the continuing education respondents were finishing coursework at Logan.

### Conclusions/Implications/Recommendations

This report contains information obtained from the first round of first destination surveys conducted through the Career Services office. We will continue to administer the survey and collect data using the same methodology in upcoming trimesters to make determinations regarding resources and support for subsequent trimesters.
