# **Chiropractic Grand Rounds**

## **Live Interactive Webinar Event**

**Friday, September 30, 2022 @  
11:30 am in Room G-134**

### **“COX® TECHNIC: RESEARCH LEADS THE WAY”**

**Presented by:  
James M. Cox, DC, DACBR, FICC, HonDLitt,  
FIANM(H)**

**Private Practice, Fort Wayne, IN**

**Developer, Cox® Technic**

**Inventor, Cox® Flexion-Distraction and Decompression  
Adjustment Manipulation Instrument, THE COX® TABLE**

**Post-Graduate Faculty, National University of Health  
Sciences, Lombard, IL**

## **James M. Cox, DC, DACBR, FICC, HonDLitt, FIANM(H)**

**A graduate of the National College of Chiropractic in 1963, Dr. James Cox enjoys a long professional life in chiropractic. He is the developer of Cox® Technic flexion distraction and decompression, author of two textbooks - Low Back Pain: Mechanism, Diagnosis, Treatment, now in its 7th edition by Lippincott Williams and Wilkins and Neck, Shoulder, and Arm Pain: Mechanism, Diagnosis, and Treatment, now in its 4th edition - and multiple peer-reviewed articles, editorial board member of the Journal of Manipulative and Physiological Therapeutics, co-researcher in biomechanical and clinical chiropractic studies, diplomate of the American Chiropractic Board of Radiology, and invited presenter at various conferences on spine care. National University of Health Sciences awarded him an Honorary Doctor of Letters, the highest recognition for meritorious research scholars. He holds an honorary fellow diplomate from the International Academy of Neuromusculoskeletal Medicine (FIANM[H]). Since 1994, his work with the research projects in collaboration with Palmer Research Center and Loyola Stritch School of Medicine and the Hines VA Hospital keeps promoting the science of chiropractic spinal manipulation. As a recognized speaker on spine pain and its relief, he has spoken for physicians around the world, and his spinal manipulation technic is practiced by over sixty percent of American chiropractors. He works from his hometown of Fort Wayne, Indiana, and consults with fellow physicians via his radiological practice, Fort Wayne Chiropractic Radiological Center. In his spare time, he enjoys going to his barn and mowing grass and woodworking (pens, bowls, cutting boards).**

## **Norman W. Kettner, DC, DACBR, FICC**

**Norman W Kettner, DC, DACBR DCBCN FICC is the Dean of Research and Emeritus Professor of the Department of Radiology at Logan University. Dr. Kettner has been a faculty member since 1980 and was department chair for 35 years. In addition to training and expertise as a board-certified radiologist and neurologist, Dr. Kettner has developed experience in the tools of functional neuroimaging including fMRI, MEG and PET. In 2001, Dr. Kettner formed a research collaboration with the Athinoula A Martinos Center for Biomedical Imaging of Massachusetts General Hospital, the largest teaching hospital of Harvard Medical School. The research objectives were to investigate the brain's responses to acupuncture in patients with chronic pain and carpal tunnel syndrome. Recently, spinal manipulation in patients with cLBP has been investigated using advanced functional neuroimaging. This collaboration has yielded numerous high impact factor publications in top-ranked radiology, neurology and pain research journals including NeuroImage, Human Brain Mapping, PAIN and BRAIN. Dr. Kettner has authored over one-hundred and fifty-seven publications and eleven textbook chapters.**
