

Master of Science in Integrative Pediatrics

Program Description

Logan University's Master of Science in Integrative Pediatrics program is an evidence-based, clinically-focused master's program that prepares students to be pediatric specialists in the field of chiropractic healthcare. Students are guided to modify and adapt the knowledge and skills acquired during their chiropractic education to meet the unique needs of the pediatric population. Upon graduation, holders of the Master of Science degree in Integrative Pediatrics will not only have all the knowledge and skills needed to meet the chiropractic healthcare needs of the youngest members of society but will also be prepared to collaborate in the greater field of integrative pediatric healthcare.

Program Learning Outcomes

Graduates of the Master of Science in Integrative Pediatrics program will be able to:

1. Utilize knowledge and skills, including critical thinking, to diagnose, manage, and treat pediatric chiropractic patients safely and effectively using best evidence. (IO2,3,4)
2. Demonstrate usage of scientific literacy skills in creating and implementing an integrative chiropractic pediatric management plan. (IO1,3)
3. Apply in a safe and effective manner the psychomotor skills associated with assessment, diagnosis, and treatment of pediatric patients. (IO2,3)
4. Exhibit fluency in communication through a people-centered lens as pertains to pediatric chiropractic care, including evidence of professionalism in chiropractic pediatric practice. (IO1,4)

WHO definition of People-Centered Health Care: An approach to care that consciously adopts the perspectives of individuals, families, and communities, and sees them as participants as well as beneficiaries of trusted health systems that respond to their needs and preferences in humane and holistic ways. People-centered care requires that people have the education and support they need to make decisions and participate in their own care. It is organized around the health needs and expectations of people rather than diseases. <https://www.who.int/teams/integrated-health-services/clinical-services-and-systems/service-organizations-and-integration>
