## Robert J. Trager, DC

**Robert J. Trager, DC** is a Chiropractic Physician and Researcher at Connor Whole Health, University Hospitals, in Cleveland, Ohio, in the United States. Working in an integrated setting, he primarily cares for patients with chronic pain. His research focuses on real-world outcomes related to the integration of chiropractic in large healthcare settings.

## **Norman W. Kettner, DC, DACBR, FICC**

**Norman W Kettner, DC, DACBR DCBCN FICC** is the Dean of Research and Emeritus Professor of the Department of Radiology at Logan University. Dr. Kettner has been a faculty member since 1980 and was department chair for 35 years. In addition to training and expertise as a board-certified radiologist and neurologist, Dr. Kettner has developed experience in the tools of functional neuroimaging including fMRI, MEG and PET. In 2001, Dr. Kettner formed a research collaboration with the Athinoula A Martinos Center for Biomedical Imaging of Massachusetts General Hospital, the largest teaching hospital of Harvard Medical School. The research objectives were to investigate the brain's responses to acupuncture in patients with chronic pain and carpal tunnel syndrome. Recently, spinal manipulation in patients with cLBP has been investigated using advanced functional neuroimaging. This collaboration has yielded numerous high impact factor publications in top-ranked radiology, neurology and pain research journals including NeuroImage, Human Brain Mapping, PAIN and BRAIN. Dr. Kettner has authored over one-hundred and fifty-seven publications and eleven textbook chapters.
